

# Kentucky Center for Mathematics Assessment Study Group

MITs and other elementary math leaders are welcome to join our assessment study group for an introductory look at the following primary assessment instruments. For the sake of efficiency, we are not planning to invite vendors, but are asking that participants share their knowledge/experience of one of the programs, either based on classroom use or online review. The Committee for Mathematics Achievement will also be completing & publishing a formal review of these programs in the coming year.
