

## Assessing Math Concepts/Developing Number Concepts Institute

The Math Perspectives Assessing Math Concepts (AMC)/ Developing Number Concepts (DNC) Institute is designed for teacher educators, math coaches, math coordinators, teacher-leaders, and classroom teachers of K-3 mathematics. AMC is an in-depth study of **how children learn number concepts**. During this institute participants will learn to use grade-level appropriate assessments from the Assessing Math Concepts series to identify the instructional needs of their students. They will also learn to use the information gained from the assessments to focus their instruction and maximize student learning using teaching strategies from the Developing Number Concepts series by Kathy Richardson.

By popular demand...

Professional development to "make sure children have a solid foundation and understanding of the mathematics they need to be successful in upper level mathematics and have the intellectual advantages each and every student deserves."

Presented by...
