KENTUCKY CENTER FOR MATHEMATICS

# Adult Education

"This professional development was different and better. It was a lot more engaging and there was a lot of useful information I was able to take back to the classroom and apply and share with others. I was able to implement new methods and practices that I had learned about and could see the success of them."---*Instructor, Russell Co. Adult Education*

LEARNING FOR LIFE

"The essence of mathematics is not to make simple things complicated, but to make complicated things simple."
- S Gudder

**Adult Education**

"I attempted to use the Depth of Knowledge resources you provided. I must say the response was fantastic. I realize I had not challenged my students enough. It was a great breakthrough for me and my students." --- *Instructor, Perry Co. Adult Education*
