

Opportunity to Recruit and Retain Mathematics Teachers

- Critical Teacher Shortage Areas have included middle and high school mathematics for the last 10 years.
- District and school administrators described limited supplies of middle and high school math teachers.
- Administrators report greater difficulty finding high school mathematics teachers than any other type of teacher except physics teachers.
- Administrators cited low numbers of applicants for posted high school mathematics positions.
- As a result of low supply in some areas, administrators reported hiring teachers who would not normally be their first choice.
