

Success in Mathematics = Finding the Best Jobs

Jobs in mathematics or jobs requiring mathematics are routinely rated as “Best Jobs.” Les Krantz, author of *Jobs Rated Almanac*, rated 200 different jobs based on: environment, income, employment outlook, physical demands and stress. The top three jobs were: Mathematician, Actuary, and Statistician. *Careerscast*

Success in Mathematics = Finding a Job in a Growth Area

“The National Science Board indicates that the growth of jobs in the mathematics-intensive science and engineering workforce is outpacing overall job growth by 3:1.” *National Science Board*

Success in Mathematics = Finding a Job!

While jobs in the growth areas of Science, Technology, Engineering, and Mathematics (STEM) require a strong grounding in mathematics, there are many careers outside STEM that require a mastery of mathematics. These include jobs in business, health care, and skilled trade.
