

Five Alive Integers!

Materials: Integer Cards
Players: 3 to 4 players
Goal: Posses the most cards at the end of the game by adding, subtracting, multiplying, and/or dividing 2 or more integers.

Rules:

1. A player shuffles the deck and deals each player five cards. Leave the rest of the deck facedown and turn over the top card from the deck. The number on this card is the number to be named.
2. Each player tries to (re)name the number on the set-apart top card by adding, subtracting, multiplying, and/or dividing the numbers on two or more of the five cards in his/her hand.
3. You can decide to take turns or go for speed and let the first player that makes a correct expression win the round. The player must show that their expression names that card. They then replace the cards in their hand by drawing from the top of the facedown deck and turn over the next card to become the new number to be named.
4. Play continues until all facedown cards have been turned over or time is called. The player who has taken the most cards at the end wins.

As always, you are encouraged to modify the games we present anyway you see fit. Games may be simplified by removing various sets of cards from the deck before play begins.
