

MRIS: Math Recovery Intervention Specialist Course

The Math Recovery Intervention Specialist (MRIS) Course is a distinctive program for teacher growth that deepens teacher understanding of student numeracy development and builds technical skills for designing data-driven, differentiated, cutting-edge instruction informed by dynamic diagnostic and formative assessments. Teachers learn to use frameworks and other pedagogical tools for learning and instruction and they benefit from participation in a teacher-centered professional learning community with very high collegial standards for ongoing reflection and rigorous study built around intensive instructional problem solving.

Course Requirements:

- Full participation at 4 initial days of training and 6 days of training throughout the school year
- Full participation in weekly online meetings
- Full participation in quarterly in-person collegial team meetings
- 100 hours of videotaped one-on-one first grade instruction
- 100 hours of video analysis, reflection, and planning
- Professional journaling
- 3 coaching visits made by the leader to the participant's classroom
- Completion of an assessment project in fall 2014
- Completion of a case study by June 2015

Training involves 10 in-person training days with coaching visits, 4 collegial team meetings, and weekly online meetings, led by Gwen Morgan, KCM Regional Coordinator.

Total Cost: \$2,993 p/ participant

*Price includes all training days, KCM Full Membership and training materials.
